University
in St. Louis

The Fourth Annual
**Washington University
Neuroscience Colloquium**

Department of Anatomy
& Neurobiology

Department of Anesthesiology

Department of Biology

Department of Biomedical
Engineering

Department of Cell Biology
& Physiology

Department of
Developmental Biology

Department of Genetics

Department of Neurology

Department of Neurosurgery
Department of Ophthalmology
& Visual Sciences

Department of Psychology
Center for Biological Systems
Engineering

Center for the Investigation of
Membrane Excitability Diseases

Center for the Study of Itch

Knight Alzheimer's Disease
Research Center

Hope Center for
Neurological Disorders

Intellectual and Developmental
Disabilities Research Center

McDonnell Center for Cellular and
Molecular Neurobiology

McDonnell Center for Systems
Neuroscience

Washington University Pain Center

Research Center for Auditory
and Vestibular Studies

Stroke and Cerebrovascular
Center

Coordinated by

Office of Neuroscience Research

Fridays at 4p, September–October

Connor Auditorium*

Farrell Learning and Teaching Center, Medical Campus

**Note exception, September 13th*

Reception immediately following, Farrell Atrium

Friday October 25, 2013

Joseph Takahashi, PhD

Professor and Loyd B. Sands

Distinguished Chair,

Department of Neuroscience

University of Texas Southwestern

Medical Center

Host, WUSTL Anesthesiology

***“Molecular Architecture of the
Circadian Clock in Mammals”***

Complete 2013 Neuroscience Colloquium Schedule

September 6: Russell Poldrack (University of Texas, Austin)

September 13: Frederic Theunissen (University of California, Berkeley)

September 20: Don Cleveland (University of California, San Diego)

October 4: John Wood (University College London)

October 11: Catherine Woolley (Northwestern University)

October 18: Timothy Murphy (University of British Columbia)

October 25: Joseph Takahashi (University of Texas, Southwestern)
